

## Dubaere Group - Corporate Carbon Footprint 2024 (preliminary communication on CCF)

Dear,

We thank you for your interest in Dubaere's carbon-reduction ambitions. As part of our broader sustainability strategy, we are committed to lowering our overall carbon footprint under the initiative "Road to Net Zero."

We currently do not provide product-specific carbon footprints. However, we have developed a **Corporate Carbon Footprint (CCF)** together with **CO<sub>2</sub>Logic (part of South Pole)**, through which we obtained the "Taking Climate Action" Silver Label.

Using the **SBTi methodology**, this label ensures full transparency of our CCF and sets clear and ambitious reduction targets for 2030. The Silver Label focuses primarily on reducing direct Scope 1 and Scope 2 emissions, with additional attention to selected Scope 3 categories such as waste and business travel. The label is audited and accredited by Vinçotte.

Our current total **Corporate Carbon Footprint**—pending final review in Q1 2026—is **65,304 tons of CO<sub>2</sub>**, including direct emissions from sourced materials such as wire rod, rebar, welded mesh, and related products. It is important to note that a Corporate Carbon Footprint (CCF) is not the same as a Life Cycle Assessment (LCA) or a Product Carbon Footprint (PCF). While the underlying data may overlap, their objectives and outputs differ. A CCF therefore cannot be used as a PCF, only as an estimation.

To support our stakeholders with an overall indication of carbon emissions per ton delivered, we have calculated an average **Product Carbon Footprint estimate** by excluding emissions from business travel, employee commuting, and capital goods.

Based on our 2024 delivery volume of approximately 140,000 tons, this results in an average estimate of **458.6 kg CO<sub>2</sub> per ton delivered**, across all product categories (coils, meshes, cut-and-bend, and related products).

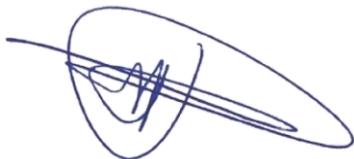

All figures will undergo final validation. Once validated, you will receive a link to our dedicated landing page providing a detailed overview of our total Corporate Carbon Footprint, our ambitions, initiatives and our intensity metric: Corporate Carbon Footprint per ton delivered.

At this moment, we do not plan to develop product-specific carbon footprints such as EPDs or PCFs.

For further questions, please feel free to contact [matthias.dubaere@dubaere-group.com](mailto:matthias.dubaere@dubaere-group.com).

Kind regards,

**Matthias Dubaere**
